

Part Number: SA23-12SYKWA

Super Bright Yellow

### Features

- 2.3 inch digit height.
- Low current operation.
- Excellent character appearance.
- High light output.
- Easy mounting on P.C. boards or sockets.
- Multicolor available.
- Mechanically rugged.
- Standard : gray face, white segment.
- RoHS compliant.

### Description

The Super Bright Yellow device is made with AlGaInP (on GaAs substrate) light emitting diode chip.

### Package Dimensions& Internal Circuit Diagram

#### Notes:

1. All dimensions are in millimeters (inches), Tolerance is  $\pm 0.25(0.01)$  unless otherwise noted.
2. The specifications, characteristics and technical data described in the datasheet are subject to change without prior notice.

## Selection Guide

| Part No.     | Dice                          | Lens Type      | Iv (ucd) [1]<br>@ 10mA |         | Description                       |
|--------------|-------------------------------|----------------|------------------------|---------|-----------------------------------|
|              |                               |                | Min.                   | Typ.    |                                   |
| SA23-12SYKWA | Super Bright Yellow (AlGaInP) | White Diffused | 255000                 | 720000  | Common Anode, Rt.<br>Hand Decimal |
|              |                               |                | *88000                 | *210000 |                                   |

### Notes:

1. Luminous intensity/ luminous Flux: +/-15%.

\* Luminous intensity value is traceable to the CIE127-2007 compliant national standards.

## Electrical / Optical Characteristics at TA=25°C

| Symbol                | Parameter                  | Device              | Typ.         | Max.          | Units | Test Conditions           |
|-----------------------|----------------------------|---------------------|--------------|---------------|-------|---------------------------|
| $\lambda_{peak}$      | Peak Wavelength            | Super Bright Yellow | 590          |               | nm    | I <sub>F</sub> =20mA      |
| $\lambda_D$ [1]       | Dominant Wavelength        | Super Bright Yellow | 590          |               | nm    | I <sub>F</sub> =20mA      |
| $\Delta\lambda_{1/2}$ | Spectral Line Half-width   | Super Bright Yellow | 20           |               | nm    | I <sub>F</sub> =20mA      |
| C                     | Capacitance                | Super Bright Yellow | 20           |               | pF    | V <sub>F</sub> =0V;f=1MHz |
| V <sub>F</sub> [2]    | Forward Voltage (DP)       | Super Bright Yellow | 8.0<br>(4.0) | 10.0<br>(5.0) | V     | I <sub>F</sub> =20mA      |
| I <sub>R</sub>        | Reverse Current (Per Chip) | Super Bright Yellow |              | 10<br>(10)    | uA    | V <sub>R</sub> =5V        |

### Notes:

1. Wavelength: +/-1nm.

2. Forward Voltage: +/-0.1V.

3. Wavelength value is traceable to the CIE127-2007 compliant national standards.

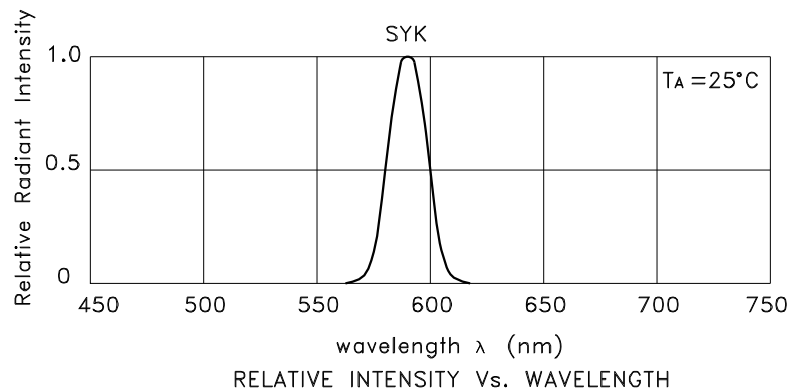

## Absolute Maximum Ratings at TA=25°C

| Parameter                       | Super Bright Yellow   | Units |
|---------------------------------|-----------------------|-------|
| Power dissipation (DP)          | 300<br>(150)          | mW    |
| DC Forward Current (DP)         | 30<br>(30)            | mA    |
| Peak Forward Current [1] (DP)   | 175<br>(175)          | mA    |
| Reverse Voltage (Per Chip)      | 5                     | V     |
| Operating / Storage Temperature | -40°C To +85°C        |       |
| Lead Solder Temperature[2]      | 260°C For 3-5 Seconds |       |

### Notes:

1. 1/10 Duty Cycle, 0.1ms Pulse Width.

2. 2mm below package base.

Super Bright Yellow

Inside Label On IC-tube

Outside Label On Box

### Terms and conditions for the usage of this document

- 1.The information included in this document reflects representative usage scenarios and is intended for technical reference only.
- 2.The part number, type, and specifications mentioned in this document are subject to future change and improvement without notice. Before production usage customer should refer to the latest datasheet for the updated specifications.
- 3.When using the products referenced in this document, please make sure the product is being operated within the environmental and electrical limits specified in the datasheet. If customer usage exceeds the specified limits, Kingbright will not be responsible for any subsequent issues.
- 4.The information in this document applies to typical usage in consumer electronics applications. If customer's application has special reliability requirements or have life-threatening liabilities, such as automotive or medical usage, please consult with Kingbright representative for further assistance.
- 5.The contents and information of this document may not be reproduced or re-transmitted without permission by Kingbright.
- 6.All design applications should refer to Kingbright application notes available at [http://www.kingbright.com/application\\_notes](http://www.kingbright.com/application_notes)

## THROUGH HOLE DISPLAY MOUNTING METHOD

### Lead Forming

Do not bend the component leads by hand without proper tools.  
The leads should be bent by clinching the upper part of the lead firmly such that the bending force is not exerted on the plastic body.

### Installation

- 1.The installation process should not apply stress to the lead terminals.
- 2.When inserting for assembly, ensure the terminal pitch matches the substrate board's hole pitch to prevent spreading or pinching the lead terminals.

- 3.The component shall be placed at least 5mm from edge of PCB to avoid damage caused excessive heat during wave soldering.

## DISPLAY SOLDERING CONDITIONS

Wave Soldering Profile For Lead-free Through-hole LED.

### NOTES:

1. Recommend the wave temperature 245°C~260°C. The maximum soldering temperature should be less than 260°C.
2. Do not apply stress on epoxy resins when temperature is over 85°C.
3. The soldering profile apply to the lead free soldering (Sn/Cu/Ag alloy).
4. During wave soldering, the PCB top-surface temperature should be kept below 105°C.
5. No more than once.

## Soldering General Notes:

1. Through-hole displays are incompatible with reflow soldering.
2. If components will undergo multiple soldering processes, or other processes where the components may be subjected to intense heat, please check with Kingbright for compatibility.

## CLEANING

1. Mild "no-clean" fluxes are recommended for use in soldering.
2. If cleaning is required, Kingbright recommends to wash components with water only. Do not use harsh organic solvents for cleaning, because they may damage the plastic parts. And the devices should not be washed for more than one minute.

## CIRCUIT DESIGN NOTES

1. Protective current-limiting resistors may be necessary to operate the Displays.
2. LEDs mounted in parallel should each be placed in series with its own current-limiting resistor.
